

Under the water

<https://riverofsong.uk/>

*Heed the call of the deep and free our seas of plastic waste.
What can we do to make our oceans fit for life on Earth?*

How can I help save our seas? - Save Our Seas Foundation

Apart from plastic waste we need to be concerned about human and other forms of waste poisoning our coastlines; it is particularly a problem around the South West peninsula in the U.K. Words and music by Dany Rosevear.

Play as a movement or hand play. Use percussion to make a sound 'scenario' to the rhythm of the tune. Sand blocks, triangles, tambourines and drums would work well.

Verse 1. Place palm on top of the back of the other hand. With thumbs out and turning move hands like fish swimming. Make swimming motions. Imitate sea creatures such as eels, octopus, turtles. etc Move hands downwards.

Verse 2. Hands scuttle like crabs. Wave seaweed hands from side to side. Hand to mouth. Hands in prayer. Hands on heart. Make fish and other sea creatures movements as before. Move hands downwards.

Un - der the wa - ter, lit - tle fish are glid - ing, Glis - ten - ing, gleam - ing, slip - ping and a - slid - ing

Am Dm Am Dm E Am
Come with me un - der - neath the sea, Where strange and won - drous crea - tures swim,

E Am C 1. E Am 2. E Am
swim - ming free, In the deep, deep blue sea. deep, blue sea.

Under the water, little fish are gliding,
Glistening, gleaming, slipping and a-sliding,
Come with me, underneath the sea,
Where strange and wondrous creatures swim,
swimming free,
In the deep, deep blue sea,
In the deep, deep blue sea.

Out in the rock pools, sandy crabs are crawling,
Seaweed is drifting, hear the ocean calling,
Save our seas, say, "NO!" to plastic waste,
Help our fishy friends to be wild, free and safe,
In the deep, deep blue sea,
In the deep, deep blue sea.
