

# Chicks grow into chickens

<https://riverofsong.uk/>

A song by David Moses. Name young animals and plants. Some species have been allocated different names for their young e.g. chick calves foal kitten pup lamb - while the young of other species are just known as cubs.

The musical score is written on three staves in 6/8 time. The first staff contains the lyrics: "Chicks grow in - to chick - ens, Calves grow in - to cows, Sy - ca - more seeds". The second staff continues: "grow in - to trees, But cubs grow in - to lions and ti - gers,". The third staff concludes: "Bad - gers, fox - es, leo - pards and wolves, and bears." Chords are indicated above the notes: C, G, G7, C, A7, Dm, G7, C, C, G7, C.

Chicks grow into chickens,  
Calves grow into cows,  
Sycamore seeds grow into trees,  
But cubs grow into lions and tigers,  
Badgers, foxes, leopards and wolves, and bears.

Foals grow into horses,  
Kittens grow into cats,  
Fresh green shoots spout out of roots,  
But cubs grow into lions and tigers,  
Badgers, foxes, leopards and wolves, and bears.

Pups grow into seals or dogs,  
Lambs grow into sheep,  
Bulbs can grow into daffodils,  
But cubs grow into lions and tigers  
Badgers, foxes, leopards and wolves, and bears.
