

Waltzing dolphins

<https://riverofsong.uk/>

Once seen, always remembered. Dolphins are fascinating creatures, agile, joyful and playful with many emotional similarities to humans.

This song was inspired by a recently retired deep sea diver I met on a morning swim. An expert in dolphins she was able to answer my questions about these marvellously intelligent creatures. I was particularly impressed how they react like for like to the moods and reactions of humans.

Words Dany Rosevear, music The Merry Widow waltz.

Can be played as a movement song waving long scarves of shades of blue and white ones.

Dolphins calling, leaping, falling,
Flying over the sea!
Tails a-flashing, leaping, splashing,
So gracefully.

"Join us in our dancing",
The dolphins call with glee!
"We'll swim together, friends forever,
Wild and free."
