

# Hedgehog hibernates

<https://riverofsong.uk/>

*A winter handplay. An opportunity to consider the animals that need to hibernate once the winter chill settles in.*

*Music by Dany Rosevear.*

***Rub arms. Interlink fingers to make hedgehog, pull into chest. Fingers move through the air. With palms curled up touching thumbs make a circle. Make pile of leaves with finger tips. Make hedge hog. Put hands to cheek.***

Here comes win - ter cold and grey, The hedge - hog tucks its - self a - way.

Here comes ice and frost and snow, It needs some - where warm to go.

Here comes mist and freez - ing fog, Here's a good old hol - low log, In -

side a pile of leaves so deep; It curls up tight and goes to sleep.

Here comes winter, cold and grey,  
The hedgehog tucks itself away.  
Here comes ice and frost and snow,  
It needs somewhere warm to go.  
Here comes mist and freezing fog,  
Here's a good old hollow log,  
Inside a pile of leaves so deep;  
It curls up tight and goes to sleep.
