

What is an insect?

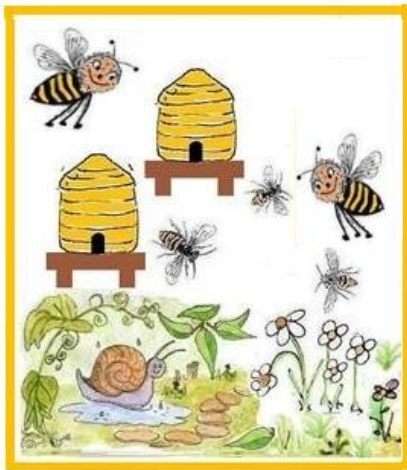

<https://riverofsong.uk/>

This song might help you remember some of the basic facts about insects.

- 1. Touch head, chest and tummy each time.**
- 2. Hold up six fingers, point to legs.**
- 3. Put forefingers up to side of head and waggle.**
- 4. Slap body, put hands over head.**
- 5. Flap elbows, wag finger from side to side.**

Head and thor - ax, ab - do - men, ab - do - men, ab - do - men.

Head and thor - ax, ab - do - men, has each in - sect!

Head and thorax, abdomen, abdomen, abdomen,
Head and thorax, abdomen, has each insect!

Every insect has six legs, has six legs, has six legs,
Every insect has six legs, six legs has each insect!

Antennae help them feel and taste, feel and taste, feel and taste,
Antennae help them feel and taste, two antennae!

Their bodies have an outer case, outer case, outer case,
Their bodies have an outer case, it protects each insect.

Most insects have two pairs of wings, two pairs of wings, two pairs
of wings,

Most insects have two pairs of wings, some don't have any!
